Whereas all the terms and conditions are acceptable for the bidder the following correction required by the bidder and is found to be acceptable as per plastering work is concerned:

<th>Description of item as per tender document</th>
<th>Changes required</th>

<td>Schedules of Rates (repair &amp; Exterior Painting) Sl no 4</td>
<td>Plaster(Wall to Wall) with sand and cement mortar including rounding off or chamfering corners as directed and raking out joints including throating, nosing and drip course, scaffolding/staging where necessary. (Excluding cost of chipping over concrete surface) with 1:3 cement mortar : 20 mm thick plaster</td>
<td>Plaster(Wall to Wall) with sand and cement mortar including rounding off or chamfering corners as directed and raking out joints including throating, nosing and drip course, scaffolding/staging where necessary. (Excluding cost of chipping over concrete surface) with 1:5 cement mortar: 20 mm thick plaster</td>
</tr>
</tbody>
</table>

The above mentioned changes are justified in the light that if cement in plaster is more than the desired than there will be flowing of plaster over a period of time resulting in damage to the plaster and the paint coat on top of it.
